About us

Because New Work doesn't work on old furniture.

25 years of healthy, energised offices. Unlike traditional manufacturers, Aeris chairs put the well-being and comfort of the user at the centre of every design, and by integrating our ergonomic solutions, we have the opportunity to create environments that promote employee satisfaction, reduce stress and increase engagement rates. Ready for New Work.

READY FOR NEW WORK

A woman with short, vibrant pink hair, wearing a light pink blazer and grey trousers, stands in a modern office environment. She is engaged in conversation with two men seated at a long, white conference table. One man, wearing a brown sweater, is looking towards her. The other man, wearing a grey shirt and glasses, is also looking towards her. The office has large windows, a wooden floor, and modern office chairs. The text 'READY FOR NEW WORK' is overlaid in large, white, bold letters across the image.

Aeris chairs enable architects and designers not only to create a novel interior aesthetic but also to transform the entire experience of work. Our designer chairs are not conventional chairs – they are a source of energy, ensuring that employees are still full of drive and dynamism, even after completing the 9-to-5 marathon. Office chairs made for time after work.

High-tech products

Bringing the art of engineering and design together.

We always design our products in lockstep with our engineers. This is the only way to ensure that our patented technologies complement our chairs' design language rather than disrupting it. We rely on high-performance materials that contribute to the fundamental functionality of our products.

Made in Munich,
distributed around
the world.

Hand-made in
Germany

All of our products are assembled by hand in Germany and undergo stringent quality checks. Not only does this enable us to ensure consistently high quality, it means we can respond quickly to specific customer requests and guarantee swift delivery.

Durability and repairs

Quality and durability are top priorities for us. Nevertheless, if you encounter a problem, all our products are designed in such a way that almost all can be repaired. Our Aeris repair service is available to ensure that our customers enjoy the benefits of Aeris products for decades to come.

Responsible footprint

We primarily source our materials from Germany, particularly the Munich region, with a smaller proportion sourced from neighbouring countries. Short supply channels ensure efficient, environmentally friendly processes. Our products are made from recyclable and recycled materials to minimise their environmental footprint.

Environmental protection and sustainability are key focuses of our agenda. We installed solar modules when building our production facility in 2007 and have continuously expanded our solar power capacity ever since. By 2024, we will produce more energy than we need to cover our in-house consumption. In addition, our construction projects have complied with KfW standards, including heat insulation measures and air-source heat pumps to significantly reduce our energy needs.

Climate neutrality

Certificates

The majority of textiles used for Aeris products come with the EU Ecolabel, as they have a lower impact on the environment than other products like them. Moreover, we source the wood we use from FSC-certified forests.

OFFICE

Our office chairs are not just pieces of furniture. They are your daily companions, helping you to achieve a more active and healthy working life. With their ergonomic design, they offer both comfort and freedom of movement, keeping you moving all day long. Concentration and productivity go hand in hand with the unique comfort our chairs provide. Aeris office chairs offer so much more than a place to sit.

CHAIRS

Further variants available at en.aeris.de

01. Aeris Numo Task – column with castors

02. Aeris Numo Task – strut with castors

03. Aeris Numo – 4-star base with castors

04. Aeris Swopper

05. Aeris 3Dee

Overview

The lightweight office chair features oscillating kinematics, our patented Self Adjusting Motion Element and universal castors with infinitely adjustable seat height. Comfort and movement, combined.

Aeris Numo Task column with castors

Aeris Numo Task spring strut with castors

The flexible seat shell with oscillating kinematics and our patented Self Adjusting Motion Element offer maximum comfort. The integrated spring-type strut extends the vertical range of movement.

Aeris Numo 4-star base with castors

An elegant, minimalist office chair with a 4-star base and castors. The patented kinematics of this designer chair's seat shell facilitate tilting movements, both forwards and backwards.

A revolution in sitting: it activates the back muscles, promotes an upright posture and offers infinitely adjustable seat height. A spring-type strut, flexible pivotal joint and 3D flexibility ensure unparalleled freedom of movement.

Aeris Swopper

The half-height backrest with lamella technology and a lumbar curve combine with the flex zone integrated in the seat for optimised posture and comfort. The integrated spring-type strut ensures flexible movement in all directions.

Aeris 3Dee

CONFERENCE

Our versatile conference chairs are not just designed for meetings: they transform seamlessly into chairs for co-working and lounge spaces, providing flexibility and comfort in every work environment. With their attractive design and ergonomic functions, they promote productivity and relaxation in equal measure. These chairs adapt to your working style and bring your space to life.

01. Aeris Numo Comfort – 4-star base with glides

02. Aeris Numo Comfort – skid base

03. Aeris Numo Comfort – wooden legs

04. Aeris Numo Task – column with glides

05. Aeris Numo – 4-star base with glides

06. Aeris Oyo

Overview

Aeris Numo Comfort 4-star base with glides

The ample, flexible seat shell can be fully cushioned for ultimate comfort. Features proven kinematics, 4-star base and glides.

The versatile variant of the Aeris Numo Comfort, also available with a fully cushioned seat shell. The unique kinematics are fully integrated into the design of the frame.

Aeris Numo Comfort skid base

The ergonomic seat cushions can also be supplemented upon request with a backrest cushion featuring lumbar curve.

Aeris Numo Comfort wooden legs

The particularly stable version of the lightweight office chair with proven kinematics. Our patented Self Adjusting Motion Element and infinitely adjustable seat height.

Aeris Numo Task column with glides

Aeris Numo 4-star base with glides

A compact conference chair with a 4-star base and gliders. Kinematics extend the range of movement forwards and backwards.

A different kind of rocking chair.
The seat shell's unique design provides a 360°
sitting experience – forwards, backwards and
to the side.

Aeris Oyo

STANDING

Our standing seats and standing mats perfectly complement an active working style. A standing seat makes it easier to work while standing, promotes blood flow and reduces fatigue. Our standing mat provides comfort and reduces the strain on legs while standing for prolonged periods. Together, they create the ideal working environment for more movement and enhanced health.

MATS

CHAIRS

01. Aeris Muvman

02. Aeris Muvman Industry

03. Aeris Muvmat

Overview

Standing chair with a 33 cm height adjustment range. The flexible front edge avoids pressure points. The practical carrying handle and low weight facilitates flexible use at different workstations.

Aeris Muvman

Robust materials and an easy-to-clean surface make this standing chair the perfect companion in industrial manufacturing. Also available as ESD version.

Aeris Muvman Industry

The standing mat with resilient foam and an integrated topographical 3D structure imitates a natural forest floor. Available in a range of cover designs.

Aeris Muvmat

A strong partnership

We only integrate the finest retail partners into our network and provide regular training. This way, we ensure outstanding care from an expert team and work together to provide excellent employee experiences.

Flexible and professional

Visions have no boundaries – so we offer an extensive range of colours and materials for all our products. Aeris products can also be adapted to align with specific colour and material concepts upon request.
